I. Statement of Reasons for Allowance:

The following is an examiner's statement of reasons for allowance:

The prior art cited herein fails to disclose a position activated switch comprising a switch body and an internal cavity of the switch body including a truncated conical surface terminating at an open end in a surface of revolution, the surface of revolution sloping outwardly from the open end of the truncated conical surface, and a ramp surface interrupting the surface of revolution, the ramp surface extending into the truncated conical surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

II. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Segoni teaches a position activated switch comprising an internal cavity of a switch body including a truncated conical surface 1b terminating at an open end in a surface of revolution 1c, the surface of revolution sloping outwardly from the open end of the truncated conical surface, but Segoni does not disclose a ramp surface.

Halleck, Devine, Grant, and Woods teach position activated switches.
